

JAMES MICHAEL D. MAGNAYE

+63 9397458955 | Batangas City, Batangas | jamesdmagnaye@gmail.com | magnaye.online

Professional Summary

Computer Science graduate with hands-on experience in full-stack development and UI/UX design, gained through academic work and personal projects. Experienced in traditional and AI-assisted development.

Skills

Frontend: HTML, CSS, JavaScript, EJS, React.js, Next.js, ReactNative

Backend: Node.js, Express.js, Flask (Python)

Database: SQL, NoSQL, PostgreSQL

Other Skills: Docker, Cloud Hosting, Figma, Adobe Photoshop, AI-Assisted Development, AI Automation, API Integration

Education

Batangas State University - TNEU

2022 - 2026

Bachelor of Science in Computer Science — Cum Laude

Experience

Batangas State University (STEER Hub - DevOps)

June 2025 - July 2025

Software Development (Internship) - Frontend

- Developed a new product display page using Next.js, delivering responsive UI components that improved product presentation and user interaction.
- Enhanced typography, color schemes, and reusable UI components with teammates, improving design consistency and overall user experience.
- Resolved frontend and backend issues by debugging quiz logic and synchronizing UI updates, ensuring accurate functionality and a seamless user flow.

Freelance

2023 - current

Software Development (Full Stack)

- Delivered full-stack web applications using Express.js, EJS, and Firebase, delivering functional platforms including a classroom-style student portal.
- Developed a medical forum/blog platform and blood bank system with real-time chat, improving information sharing and user communication.
- Implemented backend logic, database operations, REST APIs, and dynamic UIs across client projects, delivering integrated and maintainable web solutions.

Projects

Lyrice (lyrice.studio)

Full Stack/Project Lead

- Developed Lyrice, a full-stack music collaboration platform using Next.js, Express.js, Supabase, and PostgreSQL, integrating work management, collaboration, and user interaction features into a unified experience.
- Implemented secure REST APIs, role-based permissions, and content moderation for collaborative works and performance video submissions, enabling controlled publishing and management across the platform.

CodeChal

Full Stack/Project Lead

- Led the full-stack development of CodeChal, designing and implementing its competitive programming platform with authentication, problem-solving, code submission, real-time duels, team competitions, leaderboards, and custom rooms.
- Engineered a custom Docker-based code execution system to isolate, execute, and evaluate user-submitted programs against programming problems in a controlled environment.

Kodo

Mobile App Development

- Built Kodo, an offline-first mobile learning application using React Native, Expo, and TypeScript, delivering structured C++ lessons, interactive exercises, code examples, and on-device progress tracking.
- Designed adaptive practice sessions, mistake-based reviews, concept mastery tracking, and chapter challenges, helping learners reinforce programming skills through personalized repetition and practical application.

Certifications

Cisco Networking Academy

April 2025 - May 2025

HTML Essentials, JavaScript Essentials 2, CSS Essentials
